SUMMARY

Mathematics graduate from Universitas Indonesia and Hacktiv8 Full Time Data Science graduate (ranked #1 of batch), focused on turning raw, messy data into dashboards and analysis that people can act on. Experienced in SQL, Python, and Power BI end to end: profiling and cleaning source data, modeling it as a star schema, writing DAX measures, and presenting findings as clear reports. Strong statistical foundation and a habit of validating numbers before publishing them, backed by teaching and organizational experience that makes explaining results to non-technical audiences second nature.

EDUCATION

Hacktiv8 Bootcamp

Full Time Data Science Program | Final Score: 96.4% | Honor Student

April 2026 – June 2026

Jakarta, Indonesia

Universitas Indonesia

Bachelor of Science (B.Sc.) in Mathematics | GPA: 3.45/4.00

July 2022 – February 2026

Depok, Indonesia

SMA Negeri 99 Jakarta

Natural Science Major

July 2019 – May 2022

Jakarta, Indonesia

WORK EXPERIENCE

PT Kimia Farma, Tbk

Big Data Analytics Intern

July 2024 – August 2024

Jakarta, Indonesia

- Built a sales dashboard in Google Looker Studio and performed data analysis and visualization in Salesforce to report on business performance.
- Wrote SQL queries (including Common Table Expressions) and performed Create, Select, Update, and Delete operations on a Database Management System.
- Delivered a final project analyzing Kimia Farma's business performance for 2020–2023, presenting the findings as a stakeholder-ready report.
- Gained hands-on experience in Data Warehouse process flow, Data Marts, Big Data concepts, and Data Pipeline management.

SKILLS & COMPETENCIES

General Skills: Data Analysis, Exploratory Data Analysis (EDA), Business Intelligence, Dashboarding & Reporting, Data Cleaning & Transformation (ETL), Data Modeling (Star Schema), Statistical Analysis, Data Visualization, Data Storytelling

Programming & Query Languages: SQL, Python, DAX, M (Power Query), LaTeX

BI & Visualization Tools: Microsoft Power BI (Power Query, DAX, data modeling), Google Looker Studio, Kibana, Matplotlib, Seaborn, Microsoft Excel, Google Sheets

Databases & Data Platforms: Google BigQuery, Elasticsearch, Data Warehouse & Data Mart concepts

Libraries / Frameworks: Pandas, NumPy, Scikit-Learn, SciPy, Streamlit, Docker

Analytical Techniques: Data Quality Validation, Time Intelligence (YoY, trend analysis), Customer Segmentation & Clustering, Price & Variance Analysis, Concentration Analysis (HHI, Pareto/ABC), Hypothesis Testing (Kruskal-Wallis), Correlation Analysis (Pearson, Spearman), Feature Engineering

Machine Learning (supporting): K-Means, PCA, Isolation Forest, Regression, Decision Trees, Random Forest, XGBoost, NLP & Topic Modeling

Soft Skills: Leadership, Teamwork, Problem Solving, Analytical Thinking, Communication, Attention to Detail

Languages: Indonesian (Native), English (Professional Working Proficiency; TOEFL ITP Equivalent: 570)

PROJECTS

Procurement Spend & Supplier Performance Dashboard (Power BI)

August 2026

Built a six-page Power BI report over 344,504 public-sector purchase order lines (State of California SCPRS, FY2012–2015) covering spend, unit prices, and supplier performance. Cleaned and profiled the raw extract in Power Query, modeled it as a star schema, and wrote DAX measures for time intelligence, price variance against a median baseline, supplier concentration (HHI, Pareto/ABC), and small-business spend share.

Found that 0.3% of lines (1,064) drove 86% of total value, and introduced a spend-tier split so operational procurement stayed readable. Caught a silent 100x currency error where an Indonesian system locale made Power Query read decimal points as thousands separators, fixed by forcing an explicit en-US culture on all conversions.

Technology / Tools: Microsoft Power BI, Power Query (M), DAX, Star Schema Modeling, Python, Pandas, Excel, CSV

Credit Card Customer Segmentation & Persona Dashboard [GitHub]

July 2026

Segmented 4,475 credit card holders into three behavioral personas – Revolvers, Active Transactors, and Dormant – using K-Means over PCA-reduced usage features on data extracted from Google BigQuery, and presented the result as an interactive Power BI dashboard with KPI cards, a per-segment breakdown, and a management summary table.

Headline finding: all three segments held a similar average credit limit yet used the card in completely different ways, so each persona was mapped to its own revenue driver, risk level, and recommended next action.

Technology / Tools: Python, Scikit-Learn (K-Means, PCA, Isolation Forest), Google BigQuery, Microsoft Power BI, Pandas, NumPy, Matplotlib, Seaborn, Git

Voice-of-Customer Analysis of E-Commerce Reviews (NLP) [Deploy]

June 2026

Mined 5,400 Indonesian Tokopedia reviews (PRDECT-ID) to quantify what drives customer praise versus complaints. Benchmarked BERTopic against LDA and K-Means baselines, modeled positive and negative reviews separately, and surfaced 8 praise themes and 9 complaint themes, each translated into an actionable business recommendation and deployed as an interactive web app.

Technology / Tools: Python, Pandas, NumPy, Matplotlib, Seaborn, BERTopic, Transformers, Gensim (LDA), Scikit-Learn, UMAP, HDBSCAN

ORGANIZATIONAL EXPERIENCE

Lecturer & Laboratory Assistant – Numerical Differential Equation

February 2025 – June 2025

Universitas Indonesia

Depok, Indonesia

- Taught and mentored 70+ second-year students per section in numerical programming using MATLAB and Octave.
- Designed new teaching materials, timelines, and graded problem sets, and evaluated student performance.

Laboratory Assistant – Numerical Methods

February 2024 – June 2024

Universitas Indonesia

Depok, Indonesia

- Instructed 50+ first-year students per section in Python and LaTeX and coordinated with 15+ fellow assistants.
- Created teaching materials and problem sets and evaluated student assignments.

Lecturer Assistant – Introduction to Data Science

February 2024 – June 2024

Universitas Indonesia

Depok, Indonesia

- Delivered supplementary lessons to 40+ students and evaluated their assignments to strengthen subject understanding.

HIPMI PT UI 2023/2024

September 2023 – August 2024

Staff of Creative Economy, MSMEs, and Startup Development

Depok, Indonesia

- Served as Head of Event Runner at Makarapreneur, a national business plan competition.
- Coordinated across the Visual Design, Public Relations, Operations, Logistics, and Competition divisions to deliver the Final Round and Gala Dinner.

Orientasi Kegiatan Kampus UI 2023 (OKK UI 2023)

April 2023 – August 2023

Vice Head of Sponsorship

Depok, Indonesia

- Approached 100+ corporations across Instagram, Email, and LinkedIn, securing sponsorship from 24+ companies (e.g. Gojek, Bank Indonesia, Frisian Flag, Telkomsel).
- Led a team of sponsorship staff and coordinated with the treasurer to fulfill sponsor deliverables and accountability reports.

ACHIEVEMENTS

- **Hacktiv8 Honor Student** – Ranked #1 in Batch HCK-040 with a final score of 96.4% across 3 phases; Honor Student status awarded for achieving a grade of 95% or higher.
- **Best Sponsorship Staff** – OKK UI 2023; promoted to Vice Head of Sponsorship for outstanding performance.
- **10th Highest Cumulative Score** – 2022 Natural Science cohort, SMA Negeri 99 Jakarta.

CERTIFICATIONS

Lembaga Bahasa Internasional (LBI), Universitas Indonesia

October 2022

English Proficiency Test (EPT) – Score: 570 (TOEFL ITP Equivalent), Grade: A

- Certificate No. 11959/UN2.F7.LBI/PDP.00.07.01/2022

HackerRank

July 2026

Problem Solving (Basic) – Skill Certification
